Beschrijving

The charger Basic II is a reliable timer-charger with an excellent price-performance ratio. 2 rechargeable batteries (AA/1300mAh) and a USB charge cable with Micro-USB connection are included. The charger is equipped with an LED charge display, mechanical reverse polarity protection and automatic charge current adaptation. 1-2 AA / AAA NiMH rechargeable batteries can be charged. This makes this charger an inexpensive entry-point into the ANSMANN range of chargers and rechargeable batteries.
