Beschrijving

Thanks to its rating of 25 watts, this is the ideal soldering iron for medium-size soldering requirements such as distribution strips and hobby soldering. The internal heating ensures major performance. PTC heating element for short heating times and a remarkably long service life.

Supplied with nickel-plated soldering tip O172BN and tool holder OA18.

Technical data

Power rating (Watt): 25

Supply (Volt): 230

Preheating time in seconds: 60

Max Temperature in °C: 450

Design Lötspitze:

Coating Tip: nickel-plated tip

Shape of soldering tip: pencil point

Soldering tip diameter / width, mm: 0,5

Soldering / Desoldering tip: 172
