Everhardt 'Super Flex' series – made in Texas, USA

The TTL double trucker series are pre-tuned for the standard 40 CB channels. The 'Super Flex' antennas are top loaded helical wound around a 1/4 inch fiberglass rod with 'Super Flex' feature to help prevent breakage.

Supplied with an 18 foot co-phase cable and mirror mounts with stud mounts

**Features:**

- 3/4 wave antenna
- 1000 Watt 'Talking Power'
- 'Trim-to-Tune', tunable between 26 - 29 MHz
- Exclusive 'VibraSorb' and 'Super Flex' anti-breakage design

**Trim-to-Tune:**

- Remove the antenna cap
- Remove the antenna foil till the wire coil is visible
- Pull out the wire carefully and trim it only a bit and push it back
- Put the antenna cap back
- Measure the SWR and repeat the procedure till you have a good SWR

## Electrical data

- Electrical type: Top loaded / 3/4  $\lambda$  antenna
- VSWR: <1.5:1 (40 channels)
- Power peak: 1000 Watt
- Impedance: 50 Ohm
- Polarization: Linear vertical
- Cable: Yes
- Cable length: 550 cm

## Mechanical data

- Materials: Fiberglass
- Height: 900 mm
- Mounting type: On 3/8 female (stud) mount
