Beschrijving

Modified on the basis of abs filament, eABS Max has higher mechanical properties. Upgraded ABS is halogen-free, environment-friendly and flame retardant, reaching UL94V-0 level flame retardant, which is more fireproof and safer.

With high toughness and impact resistance, eABS Max can print strong and durable parts; The thermal deformation temperature is high, so this **flame retardant abs filament** can be used in some outdoor and high temperature applications.

Artikelnummer	EABSMAX
Merk	ESUN
Is on Sale	Nee
