Beschrijving

The new high performance M-5 & M-10 Stage Foggers from Antari are uniquely designed to meet the rigorous demands of stage and touring use: a high-capacity 10-liter tank that enables use between refills; a square, durable housing design that gives this stage fogger Series a refined look and eases transport. The design offers protection against stray water or spilled drinks. There are two professional versions: M-5 (1500W) and M-10 (3000W). They have DMX on-board and can be controlled remotely with a digital display control module, enabling convenient remote operation. DMX connection can be worked by either a 3 or 5 pin connector. Ideal for concerts, movie production and touring applications.

Power supply: AC 230/240 V

- 50/60 Hz

Heater: 3000 Watt
