Beschrijving

The SC-16 is a signal switching device that routes either one signal to the A, B or both jacks, or selects one of two signals from either A or B jack to send it to the common jacks. LEDs have been provided to indicate which jack(s); A,B or both, are connected to the common jacks. The SC-16 is the ideal solution for any instrumentalist who must switch between two amplifiers or who will have the instrument present at both amps. The unit also provides for two instruments to be selected for a single amplifier.

Dimensions: 95 x 73 x 40 mm (LxWxH)

Weight: 0,29 kg
