Galactic FX RGB-480

480mW RGB Laser with 5 effects

5 Laser effects in one unit

DMX & ILDA Control

480mW RGB laser with TTL modulation

Moodbeam, Burst, Polar, 3D & Scanned beam FX

The Galactic FX RGB-480 is a 5-in1 FX 480mW RGB laser unit. It has an extra fx wheel in front of the scanner pair that creates Moodbeam, Burst, Polar, 3D and Scanned beam effects. Check the online video to see all the possibilities of this special galactic laser. It can be controlled by DMX with 19 channels or ILDA. When you use ILDA you have to connect a DMX controller (2 channels) to control the effects wheel because ILDA doesn't support extra controls besides scanner pairs and laser modulation. If you like to operate it without controller you can use the 6 built in programs which can play automatic or sound activated. It also has a slave mode for a set up with multiple units. All built in programs are also selectable by DMX. In DMX mode you also have many possibilities to control the 80 built in patterns like color, clipping, zooming, X-roll, Y-Roll, Z-Roll, X-move, Y-move and applying effects.

Specifications

Power Input: AC 100-240V, 50/60Hz

Power Consumption: 40 Watt

Laser Color: Red, Yellow, Green, Blue, Purple, Cyan, White

Laser Power: 480mW (100mW 638nm Red, 80mW 532nm Green, 300mW 450nm Blue)

Laser Modulation: TTL

Laser Class: 3B

Scan Speed: 25K

Scan Angle: +/-20°

Control Modes: Auto, Sound, Master/Slave, DMX

Control Display: 4 Digits LED

DMX Channels: 19

Data Connector: In/Out, XLR 3Pin & Sub-D 25 Pole

Safety Features: Key switch, Interlock, Safety eye

Laser Safety: EN/IEC 60825-1 Ed 2, 2007-03

Dimensions: 290 x 240 x 110mm (excl. bracket)

Weight: 4,5Kg

Accessories: 2 Keys, Interlock test connector

Productinformatie

Artikelnummer	S51338
Merk	SHOWTEC
Is on Sale	Nee
