Features

\\"No-Clean\\" technology i.e. flux residues - can be left on the PCB

Halide-free

Flux residues are transparent, dry, hard and non-corrosive

High activity, good spread and high residue reliability

Soldering electronics and in electronic manufacturing, communications and miniature electronics

Hand soldering

Technical Specifications

Melting Point: 217°C

Flux Type (IEC 61190-1-3 ROLO): 1.1.3.B

Flux Content: 3,5%

Corrosive Effects (DIN 8516): None

Alloy (ISO 9453:2006): Sn95Ag4Cu1(713

Flux Core: 1 Core

Artikelnummer	SLV14/O502
Merk	STANNOL
Is on Sale	Nee
