Beschrijving

Halide-free activated
developed to cope with the higher process temperatures at lead-free soldering
very low spitting of flux
with micro doted alloys for the low solder tip consumption
High activity, good spread and high residue reliability
Flux residues - can be left on the PCB
Hand and robot soldering
Electronic and Electrical industry

Technical Specifications

Melting Point: 217°C
Flux Type (IEC 61190-1-3 RELO): 1.2.3.B
Flux Content (EN 12224): 3%
Corrosive Effects (DIN 8516): None
Alloy(FLOWTIN TSC): Sn95Ag4Cu1/713
Flux Core: 1 Core

Productinformatie

Artikelnummer	SLV22/0702
Merk	STANNOL
Is on Sale	Nee
