Beschrijving

KONTAKT CHEMIE Lub Oil 88 is a heavy-duty low-viscosity multi-purpose lubricating oil. Special active ingredients give it excellent resistance to ageing (no resinification). Because of its good cleaning action and dirt-removing power, lubricating points remain free from harmful contaminants. High-pressure additives ensure low wear and friction in the mixed friction range. KONTAKT CHEMIE Lub Oil 88 has advantageous anti-corrosion properties when applied to steel and also copper and other non-ferrous metals. KONTAKT CHEMIE Lub Oil 88 is also used for the lubrication of precision-engineered metal bearings and gears in machine manufacture and the electronics industries. It also protects lubricating points in corrosive environments and where there is increased humidity. In the low-viscosity form supplied it is very easy to apply by spraying.

Artikelnummer	K88-200
