Beschrijving

Features

- Minimum level of impurities
- Very good wetting and soldering performance
- Suitable for through hole assembly in wave and dip soldering processes
- Up to 10% more soldering joints per weighed unit
- Up to 90% less soldering defects compared to alloy from normal virgin metals
- No dangerous sulphur residues and other unwanted substances

Technical Specifications

Alloy: Sn63Pb37 (DIN 1707)
Melting Point: +183°C
Form of Delivery: Bar
Dimensions: 22x20x335mm
Weight, approx.: 1kg

Productinformatie

Artikelnummer	EL1000PB
Merk	ALPHA-COOKSON
Is on Sale	Nee
