Beschrijving

The Nexus anti vibration mounting kit is an easy to use all-in-one mounting kit to minimize vibration noise from CPU fans, case fans and hard disk drives. including 4 soft rubber feet for your case.

12 Units rubber fan mounts for open chassis fan & 12 units rubber fan mounts for open and closed chassis fan
Prevents resonance, absorbs vibrations that other wise would be transmitted from the fan into the computer case.

12 units to be used on open chassis fans

12 units to be used on open or closed chassis fans

4 units to be used per fan, so sufficient rubber fan mounts for 3 fans

12 units rubber grommets with screws for hard disk drive mounting

Helps to reduce transmitted vibration noise from the hard disk drive, by isolating the mounted hard disk drive from the chassis

Suitable for both 3.5" and 2.5" hard disk drives

4 units to be used per hard disk drive, so sufficient grommets and screws for 3 hard disk drives.

4 units rubber feet with adhesive

Superb soft rubber feet to replace and hard plastic version

Prevents the transition of unwanted vibrations from the inside of a pc via the chassis into the desk or hard floor.

With pre-applied adhesive tape

Can also be used on printers, speakers etc.

20 units tie raps
Clear plastic tie raps
To tie up loos cables to prevent them from hitting fan blades and to prevent annoying noises caused by loose cables touching the case chassis
9cm/3.54inch length
