X18B

18" Subwoofer

Special 18" subwoofer with a 4" voice coil and a long cone excursion for minimal distortion at full power and high efficiency and high power handling capacity (600 Watt).

Large wooden vent for minimal noise.

Optimal Q-load for a very smooth and deep frequency response.

Switchable active/passive crossover usage. (No disassembly of the passive crossover needed)

Phase reverse switch for the satellite system for maximum sound pressure with less power.

Advanced transducer cooling system for higher power handling capacity.

Black spray painted 18mm plywood cabinet (13 layers).

The DAP X-Series is a new collection of professional high quality loudspeaker systems which are designed and developed by the DAP Audio R&D department in the Netherlands. Special attention is given to the transducers, high drivers, horn flares and passive crossovers, which will result in a wide coverage of the audience, optimal off-axis response (no mid dip) and optimal throw. The result is higher power handling capacity, high efficiency and a very wide and smooth frequency response at any listening position. All the transducers have optimized Thiele Small Parameters and the high drivers have a very high efficiency which gives the freedom of more power handling capacity, usage of high frequency correction and a transparent sound at the highest frequencies.

Technical Info

Nominal Impedance: 8 Ohm

RMS Power Rating: 600 Watt

Program Power Rating: 1200 Watt

Peak Power Rating: 2400 Watt
Crossover Frequency L-H: 160Hz, 12-6 dB/oct
Sensitivity (Half Space): 104 dB/W/m
Maximum SPL at 1m: 138dB
Frequency Range: (-10 dB): 32-160Hz
Frequency Response: (± 3 dB): 38-160Hz
Pin Connection: 1+/1-
Dimensions (WxHxD)

Productinformatie

Artikelnummer	X-18B
Merk	DAP AUDIO
Is on Sale	Nee
