**Beschrijving**

This state-of-the-art DJ record cleaning brush combines the properties of the Tonar Classic brush and the Nostatic brush into one brush! The center part of the brush is made of ultra-fine pole high quality velvet. This velvet is flanked on both

sides by a thick layer of very fine carbon fibers. The carbon fibers remove the static from the record so the dust lays loose and can be easily picked up by the velvet in the middle of the brush even from deep in the record grooves.
