Beschrijving

The Nagaoka Rolling 1000 Record Cleaner. A record cleaner featuring a roll made of very soft silicone elastomer. One of the properties of this elastomer is that it is sticky. When rolling the cleaner over the record while applying a little pressure, the elastomer will deform and take the shape of the record groove. Any dust particles in the groove will stick to the rolling cleaner and be removed in that way. When the roll has become dusty simply wash it under tap water using a little hand soap. The dust will easily be rinsed off. After drying the roll with lint free paper, it will become just
