

TITAN NANO WARMTE GELEIDENDE PASTA 1.5 GRAM

€ 2,95

Excl. BTW: € 2,44

Afbeeldingen

Beschrijving

Take newly nanotechnology, this is a nano thermal conductive grease, features in minimizing nano-greases to improve maximum dissipation of heat generated from VGA, CPU, or LED. Create a more outstanding optimized protection against

CPU heat damage and system stability than other standard heat paste/CPU grease.

Features

1. Nano-molecular thermal grease to accelerate heatsink
With nano-grease, it can improve heat dissipation of CPU or VGA, providing greatly cooling performance.
2. Resealable syringe applicator and easy installation .
3. Compliance with RoHS requirement, provide a non-toxic and safe support.

Specification

- Net weight: 1.5g
- Color: Gray
- Thermal Conductivity: > 4.5 W/m-°C
- Thermal Impedance: < 0.205°C-in²/W
- Operation Temperture: -50 ~ 240°C
- Compositions
- Silicone Compounds: 50%
- Metal Oxide Compounds: 30%
- Carbon Compounds: 20%

Productinformatie

Artikelnummer	G30015
Merk	TITAN
