Features

- Heat-resistant up to 200°C
- Chemically neutral
- White, opaque, chemically neutral silicone paste
- Good heat conductivity

Technical Specifications

Appearance:	Paste
Colour:	White
Temperature Range:	-30...+200°C

The T12 heat transfer paste from Amasan is used as a heat transfer filling material between the contact surfaces of the semiconductor and heatsink.

Productinformatie

Artikelnummer	THERM250
Merk	STANNOL
