Beschrijving

Feature:

- Products make environmental protection materials, 3D arc surface semi transparent technology, harmless environmental protection have grade.
- Precision instruments, double thousand precision to 0.001, precision production, core technology, excellent R & D strength, packaging quality.
- Intelligent memory with fine recording and scientific optimization function, memory effect has been greatly improved.
- Multi tuyeres control airflow movement, good contact response.
- Widely be used in home, office, enterprise, government, school and car, etc.

Specifications:

- Detection range: 0.0002.88mg/m³(Formaldehyde)
- Display mode: LED digital display
- Test principle: semiconductor gas sensing principle
- Test items: formaldehyde, TVOC
- Detection temperature: - 10 ° C ~ 45C

- Alarm mode: beep alarm
- Measurement method: sensor induction technology
- Sampling mode: diffusion sampling monitoring mode automatic
- Power supply: 5 alkaline battery (AA) x2 (not included)
- Working voltage: 2.4-3.2v
- Product size: 120*55*22mm

Productinformatie

Artikelnummer	AQD090
Merk	Brand
