Beschrijving

Feature:

- Products make environmental protection materials, 3D arc surface semi transparent technology, harmless

environmental protection have grade.

- Precision instruments, double thousand precision to 0.001, precision production, core technology, excellent R & D strength, packaging quality.
- Intelligent memory with fine recording and scientific optimization function, memory effect has been greatly improved.
- Multi tuyeres control airflow movement, good contact response.
- Widely be used in home, office, enterprise, government, school and car, etc.

Specifications:

- Display mode: LED digital display
- Test principle: semiconductor gas sensing principle
- Test items: formaldehyde, TVOC
- Measurement method: sensor induction technology
- Working temperature: 0~45 (°C)
- Continuous working time: 240 (min)
- Measuring range: HCHO 0.000~3.888mg/m3 TVOC 0.000~9.999 mg/m3
- Power supply: 5 alkaline battery (AA) x2 (not included)
- Working voltage: 2.4-3.2v
- Product size: 118*53*21(mm)

Productinformatie

Artikelnummer	AQD095
Merk	Brand
