Beschrijving

The P7R CORE model is the rechargeable all-rounder that can deliver a beam up to 300 metres. It's impressive strength gives out up to 1400 lumens - with four brightness levels including a boost mode and advanced focus system. The robust air craft grade aluminium casing provides protection from dust, water and is corrosive resistant. The clever P7R CORE will let you know when the charge is running low and when it is fully charged with the battery indicator. Magnetic charging is a fast and fuss-free process taking just 4.5 hours for full charge.

Environmentally friendly - housing and rechargeable battery last significantly longer than disposable alternatives
