Beschrijving

Lead Acid Charger for 6V/12V/24V with 4,5...160Ah

Features

- For 6 V- /12 V- or 24V lead-acid, lead-gel and sealed lead-acid batteries with a capacity of 4.5 Ah ... 160 and up to 4A charging current
- "Cold-Temp"-Mode: At temperatures below 5 °C (41°F) we recommend the "Cold Temperature" mode. To activate, press the „Mode“ button for about 3 seconds.
- Automatic "Refresh" mode: The charger automatically detects when the battery is fully discharged
- Automatic "Fault" indicator : In the case of a defective battery the „FAULT“ LED is on. The charging stops.
- Charging status indicator
- Protection against short-circuit, wrong polarity and overcharge
- Crocodile clips included
- For standby and parallel operations

Technical Specifications

Input Voltage (50Hz):	230V
Dimensions:	210x63x46mm
Protection Class:	II
Protection:	IP65
Weight:	556g

Part Nr.	U_N [V]	U_{End} [V]	I_{max} [mA]
ALCT6-24/4	6	7,25	1000
	12	14,5	4000
	24	29,0	2000

U_N = Rated Voltage, U_{End} = Final Voltage, I_{max} = Maximum Charging Current

Productinformatie

Artikelnummer	ALCT6-24-4
Merk	ANSMANN
