

ARDUINO FM RADIO

€ 8,95

Excl. BTW: € 7,40

Afbeeldingen

Beschrijving

- power supply: 5V
- Frequency range: 76-108MHZ
- PCB size: 31*30mm
- With reverse polarity protection diode
- With power output filtering sensor
- Directly plug antenna interface
- I2C bus communication
- Multi capacitor combined filter
- Blue LED power indicator
- FM chip module TEA5767

- Onboard 3.5mm audio interface
 - If connects with singlechip, only connect the Power Ground and two I2C communication cable
- Features:
- LC harmonic oscillator use low cost fixed chip
 - No need to adjust Intermediate frequency
 - High sensitivity(low noise RF input amplifier)
 - High power auto gain control AGC circuit
 - Soft mute

Productinformatie

Artikelnummer	ARD/FM
Merk	Brand
