Beschrijving

Construction

- Vacuum encapsulated, bobbin with two chambers
- Leads through soldering pins to accommodate PCB mounting
- Designed to match VDE 0570 and EN61558 regulations
- Fully tested at primary and secondary voltage of 6000V, leakage and sparking distance in air is at least 10mm
- Types with double primary and secondary windings (2x115V) suitable for application in 115V as well as 230V power supplies

Size

| Performance | Height h [mm] | Weight [g] |
|-------------|------------------|---------------|
| 40VA | 38,7 | 780 |
| 60VA | 47,9 | 1100 |
