Beschrijving

The controller is adopted 8 digital tube to show the modes of time and work. It adopts PWM dimmer electric. It matches the precise clock chip which can control the brightness and darkness of the light according to the time. When present time is same as the predicted time, the light will change as previous brightness. You can set 5 scenes during the 24 hours one day. By optional sensor, the controller can automatically adjust the brightness of the light according to the brightness and darkness of the environment optical line. The controller can be used for the normal one. The controller works through the infrared remote controller, and operate easily.

Supply voltage: DC12-24V

Output: 3 circuit

Output current: 4A/ch

controller size: L122xW71xH25mm

Static consumption: <0.24W

Output power:12V;Ü144W;24V;Ü288W
PWM signal class:256 level
PWM signal frequency:325HZ
Remote Control distance:>10M
Time deviation:<5 seconds per month

Productinformatie

Artikelnummer	LC316
Merk	Brand
Is on Sale	Nee
