### Beschrijving

#### Application

For effective ESD safe desoldering and repair of soldering joints eliminating additional cleaning. The braid is put onto the joint which has to be soldered and heated with a soldering iron. The desoldering braid then absorbs the liquid tin.

#### Features

- Fast and effective desoldering
- A special halide-free "No Clean" flux
- Residues are minimal, non-corrosive and non-hygroscopic
- ESD-secure wick
- Heat resistant layer, vacuum packed
- Very durable
- Suitable for lead-free soldering
